Profile

I am currently pursuing a Bachelor of Computer Science degree at Ain Shams University, with a passion for web development. While I am relatively new to React and React Router, I am a quick learner and have made significant progress in mastering these technologies.

In addition to React, I have experience with HTML, CSS, JavaScript, and other related technologies. I am always eager to take on new challenges and expand my knowledge to keep up with the latest trends in the industry.

I have worked on several web development projects, both individually and as part of a team. I am a detail-oriented developer with a strong work ethic and a commitment to delivering high-quality work.

In my free time, I enjoy experimenting with new web development tools and techniques, and I am always seeking out opportunities to learn and grow as a developer. I am excited to continue my journey in web development and contribute my skills to any team I work with.

Education

2021 – 2025 **Bachelor of Computer Science**

Projects

Personal Portfolio [🔗](#)

Personal Portfolio using ReactJs , React-router and Tailwind CSS

My vans store [🔗](#)

Vanlife app is a web application that you built in collaboration with a course instructor. The project serves as a training exercise for working with React Router, a powerful tool for managing the routing of a React application. The app includes a simulated login function and error handling features, providing an opportunity to practice these important development skills.

Password generator Google extension [🔗](#)

a powerful password generator Chrome extension built with JavaScript! With this project, I aimed to create a tool that makes it easy for users to generate strong and secure passwords for all their online accounts.

Photo Editor [🔗](#)

a simple image editor created entirely with JavaScript! With this project, I aimed to showcase my skills in manipulating images using code. This editor allows users to make basic filters edits to images

Translation Using API [🔗](#)

A small project using translation APIs could involve creating a simple web application that allows users to enter text in one language and get a translation in another language using an APIs.

XO game [🔗](#)

a fun and addictive game of Xo built with JavaScript! This game offers a classic gameplay experience, where two players take turns marking spaces on a 3x3 grid

Skills

Awards

2nd place winner in EGDC (Egypt game development contest)(Cairo ICT 2022) [🔗](#)

2nd Place Winner, Egyptian Game Development Competition (EGDC) (2023): Our team of college developers won 2nd place in the highly competitive Egyptian Game Development Competition (EGDC) for our game Sonic Mania. The competition was exclusively for college developers and brought together top talent from across Egypt to showcase their innovative and creative game development skills. Winning this award is a testament to our team's dedication and hard work in developing a unique and engaging gaming experience while balancing our academic commitments.
